

DATA CENTRE COLOCATION – BRUSSELS

AVENUE LEON GROSJEAN N°.2, 1140 EVRE, BRUSSELS, BELGIUM

Facility Specifications

- Modern data centre facility situated in the east of Brussels
- Operational since February 2000
- Technical space arranged over 2 floors
- Total Size: 5,842m²
- Fully fitted Colocation space: 1,343m²
- Maximum Site Power: 4MVA
- Carrier Connectivity: Level 3, Colt, Belnet, Verizon, Belgacom, Telenet, BT Ignite, Telia, Coditel, Scarlet, yntigo

Standards

- ISO27001:2013 Work in progress towards achieving certification of ISMS for Colocation
- ISO50001: Work in progress

Power

- 3 x 1MVA HV dedicated underground cable feeds to 3 x 1MVA (4 x 1MVA ultimate) transformer station

Generators

- 2 x 2MVA diesel driven emergency power generators giving 4MVA
- Automatic start in less than 1 minute to feed 100% of the facility
- Generators tested monthly
- Fuel storage (diesel) for 24 hour continuous operation at 100% load
- 24 x 7 agreement with local fuel supplier

UPS

- 3 x 500kVA Hybrid Rotary UPS modules providing 1000kVA total output with N+1 redundancy
- 15 minute battery autonomy per UPS module
- Underfloor power track distribution system

Environment

- 750W/m² average cooling capability over the gross space
- Temperature regulated to below 26°C
- Humidity regulated overall to 50%RH +/- 20%
- Technical areas positively pressurised to minimise dust ingress

Physical

- Minimum floor to ceiling height: 3,530mm from top of raised floor
- 800mm raised floor height
- Raised Floor loading 10kN/m²
- Structural Floor Slab: > 10kN/m²

Fire Strategy

- Use of non-flammable and low smoke zero halogen materials where possible
- No storage (especially of flammable materials) within technical space
- Building split into sealed, independent, fire compartments
- Very Intelligent Early Warning (V.I.E.W.) detection above and below raised floor
- Smoke extract system activated by fire alarm
- Double Interlocked pre-action dry pipe sprinkler system

Security

- Remote 24 x 7 security monitoring
- Full electronic access control system, based on proximity cards with photo and PIN keypads
- Biometric Palm-scanners in addition for Colocation areas
- Locks on colocation suites and cabinets. Card readers installed on private suites
- Intruder detection system on escape and riser doors

CCTV

- CCTV monitoring and recording of all access points and circulation areas

Building Monitoring Systems (BMS)

- Location Operations and Control Centre
- Network monitoring system with critical alarm repeating to Regional Management Centre
- 24 x 7 local monitoring and logging of temperature and humidity conditions and alarms
- Full perimeter under-floor leak detection linked to building monitoring system

Telecoms Infrastructure

- Facility is designed to accommodate standard rack/cabinets of 2,200mm nominal height
- Power is normally distributed under floor, fibre and copper cabling distributed overhead (fibre within a managed containment system, copper within a heavy duty ladder rack system)
- Fibre entry to the building is via two independent points

General Facilities

- Dedicated loading area - delivery hours 09:00-17:00 Mon to Fri
- Customer test room (63m²) & storage area (77m²)
- Goods lift - 1.8m wide x 2.4m high - maximum load 2,600kg

Why choose Level 3 Data Center Services?

Level 3 operates more than 350 data centres in North America, Europe, and Latin America.

Our Premier Elite, Premier Select and Premier data centres deliver scalable solutions to help customers grow their businesses, become more efficient, and reduce costs.

Direct access to the Level 3 network in more than 45 countries.

Customized solutions to meet your specific space and power needs.

Professional Services provide remote support for implementation and network management and monitoring.

ABOUT LEVEL 3

We build, operate and take end-to-end responsibility for the network solutions that connect you to the world. We put customers first and take ownership of reliability and security across our broad portfolio.
