EQUINIX MELBOURNE DATA CENTERS

Equinix helps companies accelerate business performance by connecting them to their customers and partners inside the world's most networked data centers. Our Melbourne International Business Exchange™ (IBX®) data centers are business hubs for 200+ companies. Customers can choose from a broad range of network services from 50+ network service providers and can interconnect directly to customers and partners in their digital supply chain. In addition, our facilities are ideal interconnection locations to access Australia's second largest economy.

Our Melbourne facilities offer strong network and cloud connectivity as well as direct access to the Victoria Internet Exchange. Equinix Melbourne have two campus locations combined with presence in all major cities across Australia giving customers network-rich redundant options within the same city and across the country allowing for implementation of a full disaster recovery strategy within Equinix. In addition, our newest data center, ME2, is targeted to open in late 2019.

MELBOURNE IBX® BENEFITS

- Ideal interconnection locations to access Australia's second largest economy
- Direct access to the Victoria Internet Exchange
- Private and secure connection to cloud providers, network providers and digital services
- · Direct connection to AWS and Microsoft Azure
- Access to the diverse local economy, including advanced manufacturing, global financial and multinational firms, professional and scientific services and technology companies
- Two campus locations to give customers network-rich redundant options
- Network-neutral, highly scalable, secure colocation environments

IBX TECHNICAL SPECIFICATIONS

Building

Space

-pass	
Colocation Space	3,326 m² (35,799 ft²)
Building Type	2 story, reinforced concrete structure
Parking	Adjacent to building (no charge)
Floor	
Floor Type	Raised
Floor Load Capacity	11.97 kN/m² (250 psf)
Fire Suppression	VESDA, smoke and heat

detectors, double-interlock preaction sprinklers (dry pipe)

Power and Cooling

•	
Average Power and Cooling Density	2.5 - 4.5 kVA per cabinet
UPS Configuration	Block redundant
UPS Redundancy	N+1
Standby Power Configuration	5 x 2,250 kVA diesel generators
Standby Power Redundancy	N+1
Cooling Configuration	Indirect evaporative coolers
Cooling Redundancy	N+1

Security

Physical	Perimeter fence and gate, mantrap
Human	24x7 onsite security officers
Electronic	Biometric readers (in common areas), biometric Rreaders (optional), speedstiles with biometric 2-factor authentication, CCTV surveillance with 30-day retention, motion detection

Amenities

- Break Room
